

# AuthentiKid: The Commercial Capability Matrix (2026)

## The "Bells, Whistles, & Fireworks" Showcase

Target Customer	Software Module	The "Fireworks" Features	Value Proposition
School IT Directors	EduLock Master Console	<ul style="list-style-type: none"> <li>• The Global Kill Switch: District-wide revocation in &amp;lt; 1 sec.</li> <li>• Muster Status Map: Real-time campus safety visualization.</li> <li>• Bulk Key Issuance: 60-second onboarding for 2,000+ students.</li> <li>• Compliance Audit Trail: Tamper-proof logs with FERPA/COPPA disclaimers.</li> </ul>	"Compliance-in-a-Box" for districts requiring zero-friction student data safety.
Parents & Guardians	Guardian Dashboard	<ul style="list-style-type: none"> <li>• Emergency Override: The "Digital Time-Out" with school notification.</li> <li>• Contextual Consent Toggles: Modularity for doom-scrolling &amp; in-app spending.</li> <li>• Vibe-Check Intelligence: Detection of student identity hijacking via behavioral patterns.</li> </ul>	"Frictionless Trust" between families, tech, and the classroom.
Corporate CTOs	AuthentiLock SDK	<ul style="list-style-type: none"> <li>• The Anti-Leech Seal: Domain-locked, SRI-protected code wrapper.</li> <li>• Market Intel Engine: Automated detection of</li> </ul>	"Risk Removal" that replaces multimillion-dollar COPPA liability with a one-line SDK.

Target Customer	Software Module	The "Fireworks" Features	Value Proposition
		unprotected traffic via AuthentiKid.com. • Risk Math Calculator: Real-time visibility into \$53,088-per-child liability gaps.	
Dev Partners	Developer Portal	• Stateless Identity Check: Verification without holding student PII. • MasterKey Vault: Cryptographically sealed keys for partner integrity. • Runtime Self-Destruct: Logic that severs connections if code is spoofed or moved.	"Integrity First" engineering for high-scale platforms like Disney and Roblox.

### The "Anti-Leech" Technical Specifications

- Zero-Knowledge PII: We validate age-brackets without ever touching a child's name.
- Domain-Locked Auth: Our SDK only "wakes up" on verified partner domains (e.g., snapchat.com).
- The "X" Purge Window: Dynamic, district-wide data retention control that adapts to changing state laws in one click.
- MasterEduKey Logic: A hierarchical permission system (User → Master → Grand Master) that ensures only authorized CTOs or Admins can alter safety settings.

# The AuthentiKid SDK: Feature & Function Matrix

Customer	Software Component	Key Functions & "Fireworks"
School Districts (IT & Admins)	EduLock Master Console	<ul style="list-style-type: none"><li>• The Global Kill Switch: Instant, district-wide revocation of all keys.</li><li>• Muster Status Map: Real-time spatial tracking of student safety during lockdowns.</li><li>• Audit Trail Pro: Tamper-proof logs with FERPA/COPPA legal disclaimers.</li><li>• Bulk Key Issuance: 60-second onboarding of thousands of students via CSV.</li></ul>
Parents & Guardians (The Handshake)	Guardian Dashboard	<ul style="list-style-type: none"><li>• Emergency Override: One-tap "Digital Time-Out" with instant school notification.</li><li>• Consent Modularity: Toggles for in-game spending, doom-scrolling, and P2P calls.</li><li>• Vibe-Check Sensitivity: Adjustable behavioral detection thresholds for identity verification.</li></ul>
Corporations / CTOs (Disney, Snap, etc.)	AuthentiLock SDK	<ul style="list-style-type: none"><li>• The Anti-Leech Seal: Domain-locked, SRI-protected code wrapper to prevent hijacking.</li><li>• Market Intel Engine: Automated detection of traffic risk (\$53,088 per-child liability math).</li><li>• One-Line Integration: A single-line script that closes a multimillion-dollar compliance gap.</li></ul>
Developer Partners (Engineering Teams)	Dev Portal & API	<ul style="list-style-type: none"><li>• Stateless Identity Check: Verification without storing or seeing student PII.</li><li>• MasterKey Vault: Cryptographically sealed activation keys for high-integrity deployments.</li><li>• Runtime Integrity Attestation: Self-destruct logic if the code is altered or spoofed.</li></ul>
